Lionel Cassar

About Me

My name is Lionel. I have been working as a Full-Stack Developer since 2019 and hold a university degree in software development. I have experience maintaining and developing CRM, ERP, and WMS systems. I am motivated to take on responsibilities and provide effective technical solutions.

Work Experience

Full-Stack Developer

December 2024 – May 2026

Soyculto, Argentina

Responsible for the development of a WMS system using Laravel and Blade in the logistics sector. Implemented and deployed the project on company servers, designed the database architecture, and participated in technology selection to ensure system stability and reliability.

Full-Stack Developer

September 2023 – November 2024

WIPPIE SA, Argentina

Responsible for the development and maintenance of a PHP-based ERP system used by public institutions in an Argentine province. Implemented Front-End and Back-End functionalities, managed production deployments, administered relational databases, integrated secure communication through SSL with X-Road, and processed high-volume CSV files.

Full-Stack Developer

September 2021 – September 2023

GRUPO AGNI SA, Argentina

Member of a development team working on a cloud-based CRM system using Laravel and React. Implemented Front-End and Back-End functionalities, managed NoSQL databases, integrated APIs, and created reusable components.

Education

2020 - 2022 | UNICEN - Tandil (Argentina)

University Degree in Application Development

2012 | Lycée Balzac - Tours (France)

BTS Marketing

Skills

- Deployment and maintenance of production applications
- Automation using N8N, APIs, and custom scripts
- Implementation of background services
- Application of design patterns with React and Laravel
- Team meetings in multiple languages
- Personal project: autoscompartidos.com
- Self-taught learning: N8N, MPC, Python, Vue.js, .NET, Node.js
